[arno.laud@maryland.gov](mailto:arno.laud@maryland.gov)  
(410) 537-3510

## What is NetDMR?

NetDMR is a Web-based tool that allows National Pollutant Discharge Elimination System (NPDES) permittees to electronically sign and submit their Discharge Monitoring Reports (DMRs) to EPA's [Integrated Compliance Information System \(ICIS-NPDES\)](#) via the [Environmental Information Exchange Network](#).

NetDMR is designed to reduce the burden on EPA, states, and the regulated community; improve data quality; provide a cost savings; and expand the ability of both states and EPA in targeting their limited resources to meet environmental goals. An essential component of NetDMR is the exchange of data with ICIS-NPDES, which allows permittees to complete a DMR that is specific to their permit limits and outfalls.

# NetDMR

## Catch the Wave

### WHO CAN REPORT?

NPDES permittees required to submit DMRs may use NetDMR. Permittees must receive appropriate training before requesting and receiving permission to use NetDMR.

Once approved, a facility may begin submitting its DMRs electronically.

GOOD FOR THE ENVIRONMENT

GOOD FOR YOU

## What are the Maryland Department of the Environment plans for NetDMR Implementation?

The NetDMR program is now available. Be sure to Catch the Wave! Permittee and data provider training will be offered by Webinar. We recommend that you attend both training sessions. Upon completion of NetDMR training, permittees will be able to log on to the NetDMR test database and allow staff to try different roles and responsibilities, perform direct DMR entry or importing DMR data, and signing forms. After one or more successful transmissions of DMR data, you can create your account, submit the signed subscriber agreement to the Maryland Department of the Environment, get approval for signatory and permit administrator authority, and go "live" in time for your future DMR submittals.
